PRODUCT CONCEPT

IBQ-MEC-511 is a high-strength bi-stretch plain weave fabric developed for outdoor, tactical and technical workwear applications. Built with 92% Polyamide and 8% Elastane (Lycra®) in a complex 4-way stretch woven construction, it combines tear strength, abrasion resistance, snagging resistance, pilling performance and wearer comfort in a 250 g/m² construction.

Available as a 3-layer laminated version, IBQ-MEC-511-JRS-WR adds a waterproof and breathable PU membrane with polyester jersey backing, increasing the weight to 330 g/m² for enhanced weather protection. An engineered matching seam tape is also available.

BI-STRETCH COMFORT
92% Polyamide and 8% Elastane construction for flexibility, wearer comfort and freedom of movement.

> 250K ABRASION
Minimum 250,000 Martindale cycles according to EN ISO 12947-2.

TEAR RESISTANCE
Up to **90 N weft** in IBQ-MEC-511-WR, **75 N weft** in IBQ-MEC-511-CAM-DWR and **110 N weft** in IBQ-MEC-511-JRS-WR, according to EN ISO 13937-2.

WATER REPELLENT
Spray test rating **ISO 4-5** for WR and JRS-WR versions, and **ISO 4** for CAM-DWR, according to EN ISO 4920.

DURABLE SURFACE
Pilling rating **4-5 after 7,000 rubs**, with strong abrasion, snagging and surface resistance depending on the version.

HIGH TENSILE STRENGTH
1200 N warp / 1500 N weft in the base WR and CAM-DWR versions.

ABRASION RESISTANCE EN ISO 12947-2 · MARTINDALE CYCLES

IBQ-MEC-511 delivers up to 5x higher abrasion resistance than a standard technical stretch fabric.

TENSILE STRENGTH STANDARD: UNE-EN-ISO 13934-1

High tensile strength for demanding outdoor, tactical and workwear applications.

CERTIFICATION PROFILE APPLICABLE TO IBQ-MEC-511-WR AND IBQ-MEC-511-CAM-DWR

TEST	RESULT	ENTITY	STANDARD
High visibility clothing	PASS	AITEX	EN ISO 20471:2013
Motorcycle impact abrasion test	AA Zone 2	OMEGA	EN 17092

TEAR RESISTANCE — TROUSER SHAPED STANDARD: EN ISO 13937-2

FIELDS OF APPLICATION

MOTORSPORTS

MOUNTAIN & ADVENTURE

TACTICAL

WORKPLACE

EMERGENCY RESPONSE
